From the 16th c. there seems to have been a tendency to confine the use of the form *stablish* to those uses in which the relation of meaning to *stable* adj. is apparent, i. e. where the notion is rather 'to strengthen or support (something existing)' than 'to found or set up'. The modern currency of the word is purely literary, and reminiscent of the Bible or Prayer Book.

Stadia (stē·diă). [Of obscure history; prob. derived from Stadium, and perhaps from the plural *stadia*. Cf. F. *stadia* (Littré *Suppl.*, with quot. of 1876).

It is doubtful in what country the word originated; the statement in the first quot. below lacks confirmation.]

An apparatus for measuring distance by optical means. **a.** *Mil.* An instrument consisting of a glass plate, or a brass plate with an opening of the form of an isosceles triangle, marked with figures showing the distance at which a foot- or horse-soldier will be when his image covers a certain height on the instrument held at arm's length. **b.** *Surveying.* An apparatus consisting of a rod or staff placed at one end of the distance to be measured and a pair of horizontal lines, hairs or wires on the diaphragm of a telescope placed at the other end. Also *attrib.* as in *stadia hairs, lines, measurement, method, -rod, -surveying, telescope.*

By British surveyors *stadia* is commonly used as equivalent to 'stadia rod'; in the U. S. this use appears to be rare. The 'stadia method' has two varieties: in the one the staff is graduated and the telescope hairs fixed at a known distance apart; in the other the staff is of known length and the hairs are movable.

1865 Mayer in *Jrnl. Franklin Inst.* Jan. 4 The idea to measure the distances by a scale and the micrometer of a telescope was proposed by an Italian engineer about 45 years ago, and the name of Stadia (scale) was given by him to that kind of measure. *Ibid.* 5 Construction of a Stadia. *Ibid.*, To..compute the error of the reading on the Stadia scale. 1865 S. W. Robinson *Ibid.* Feb. 74 The error of the stadia measurement has been found to be about one foot in 800 or 1000. *Ibid.* 75 A much more convenient arrangement than the rod and targets, is a flat surface of three or four inches width and the required length, painted in such a manner that the distance can be read to a foot by the observer himself. By the French this is called a *stadia.* 1871 *Trans. Amer. Inst. Min. Engin.* I. 377 An extra pair of hairs for stadia purposes. 1890 W. F. Stanley *Surv. Instrum.* 321 For convenience the tangent is more generally taken upon a graduated stadia or staff which is erected for measurement perpendicularly to the horizon. 1899 W. G. Bligh *Notes Instrum. Engin. Field-work* 122 The telescope fitted with stadia lines on a stop glass. *Ibid.* 124 Stadia hairs are horizontal lines, either hairs fixed to the diaphragm or else marked on a stop glass. 1900 H. M. Wilson *Topogr. Surveying* xii. 238 The stadia is a device for determining the distance of a point by means of a graduated rod, and the distance subtended on it by auxiliary wires in the telescope of a transit or alidade. *Ibid.*, The term *stadia surveying* is used to include not only the measurement of the horizontal distance, but also the determination of heights by means of vertical angles observed to a fixed point on the rod.

Stage (stēdʒ), *sb.* Also 6 *north.* **stayge**, *Sc.* **staige**; pl. **stagies.** [ad. OF. *estage* masc. (mod.F. *étage*) = Pr. *estatge* (also *estatga* fem.), It. *staggio* station, dwelling (*obs.*), support for a net, side of a ladder, etc.:—popular L. **staticum*, f. L. *stāre* to stand (OF. *ester*, Prov. *estar*). From the etymological meaning standing, station, standing place, were developed in OF. many special senses, which passed into ME.; the only senses that have survived into mod.Fr. are 'story of a building' (= 1 a) and certain fig. applications of this. Mod.F. *stage*, the 'terms' to be kept before admission to certain professions, is ad. med.L. *stagium*, ad. OF. *estage*. In OF. *estage* was taken as the etymological equivalent of L. *stadium*, and used to render that word as denoting an ancient measure of distance (hence sense 7 below). Branch IV represents an English development of meaning, which seems to have begun about 1600, and for which it is not easy precisely to account. It may in some degree have been influenced by the notion of an etymological connexion of the word with L. *stadium*; at any rate this notion is distinctly traceable in the medical use 11 b.]

Stager (stē·dʒəɹ). [f. Stage *sb.* + -er 1.

It is not wholly impossible that in the expression *old stager* (sense 1 below) the word may be ad. OF. *estagier* an inhabitant, resident (f. *estage* Stage *sb.*), or med.L. *stagiārius* (see Staciary 1) which is used in English monastic records (e. g. *Cust. St. Augustine's, Canterbury,* Henry Bradshaw Soc. Publ. XXIII) for an aged monk who was lodged permanently in the infirmary. Derivation from Stage *sb.* is, however, more probable, but the precise notion seems difficult to determine. The usual explanation that the theatrical stage is alluded to ('one who has been long on the stage of life') finds no support in the 16th and 17th c. examples; the primary sense may be that indicated in the definition of sense 2, but this is supported only by a single quotation.]

†Stainand, *a. Her. Obs.* Also 6 **staynand,** 7 **staynant,** 7, 9 **stainant.** [app. a pres. pple. of STAIN *v.* (either northern ME. or repr. OF. *desteignant*).] An epithet of certain colours.

The precise sense and correct application are very doubtful, most of the successive writers having apparently copied from their predecessors with little understanding. The Book of St. Albans (quot. 1486 s.v. STAINING *ppl. a.*) seems to use 'steining colowre' for any tincture (whether 'colour' or 'metal') which presents a uniform tint in contradistinction to spots, etc.; according to this authority the 'steining' colours are the only ones that may appear on the shield of a gentleman. On the other hand, according to Legh (1562), 'staynande' colours are those which may *not* be used in armory; *tawny* or *tenné*, being the 'surest' of all the mixed colours, is the only one of them that is not 'staynande'; we may perhaps hence infer that Legh took the adj. to mean 'fugitive' (cf. STAIN *v.* 2), or rather 'indeterminate'. Guillim (1610) says that some heralds disallow the use of *tawny* and *murrey* (or *sanguine*) for fields, regarding them as 'staynande' (Ferne in 1586 speaks of these two as 'stains', not colours), but it is not clear how he interpreted the adj. The later notion that *staynand* means 'disgraceful', designating tinctures that are used for the purpose of 'abatement', appears to be entirely unfounded.

1562 LEGH *Armory* 19 Tawney,..blazed by thys woorde, Tenne. It is a worshipfull colour...But very fewe Englishe men beare the same. Yet it is armorye, and so are all coloures, that are not staynandes. *Ibid.* 19 b, Tenne..is the surest colour..beeyng componed. For it is made of two bryghte coloures, whiche is Redde, and Yellowe. And ye shall not haue any colour so made emongest all yt may be deuysed, and not to be staynande. 1610 GUILLIM *Heraldry* I. iii. 11 [Copies Legh and continues thus:—] The last of the seuen mixed colours, we doe commonly call Murrey, but in Blazon, Sanguine, and is (as most truly saith Leigh) a Princely Colour, being indeed one of the colors appertaining of ancient time to the Prince of Wales...Some Heralds of approued iudgement doe hardly admit these two last mentioned for Colours of Fields, in regard they are reckoned Staynand Colours. 1658 PHILLIPS, *Stainand*-colours, in Heraldry are tawney and murrey. 1673 A. WALKER *Lex Lachrym.* 25 Though a rough Herald would have found blots enough in Abner's Scutcheon, and a rude Pencil would have painted it with staynant Colours, or a Scotch Coal. 1689 SMITHURST *Britain's Glory* 167 *Tenne*, Orange Colour; a Colour Stainant. 1845 LOWER *Curios. 1. An ascending series or 'flight' of steps leading from one level to another, esp. from one floor to another in a house; a staircase.

Still the ordinary use in Scotland, where 'up the stair', 'down the stair' are the usual equivalents for *upstairs, downstairs*, and '(to go up) six stairs' means what in England would be expressed by 'six flights of stairs'. (The whole series of steps between two successive floors counts, however, as a single 'stair', even when it consists of two or more 'flights' or portions separated by a landing.) In England the sing. in this sense is now very rare, exc. in phr. *on the stair*, which is itself slightly archaic.

Stake (stēk), *sb.*[2] [Of uncertain etymology.

Perh. f. STAKE *v.*[3] On the alternative supposition that the sb. is the source of the vb., the former may be the same word as STAKE *sb.*[1] The peculiar use might have been developed from the phrase *on the stake*, which may originally have referred to a custom of placing on a 'stake' or post the object (an article of clothing or the like) hazarded on the event of a game or contest. There is, however, no evidence of the existence of such a custom; and in our quots. the first example of the phrase is dated 1592, while the use of the sb. to denote the money risked on a game of dice is more than half a century older.]

Stale (stēil), *sb.*[3] [Prob. a. AF. *estale*, *estal* (only in Bozon, 13th c.), applied to a pigeon used to entice a hawk into the net; that this word is not an adoption from English is rendered probable by the occurrence of the extended form *estalon* in continental Fr. with the same sense (Cotgrave 1611; Godefroy gives earlier instances spelt *estolon*, *etelon*). Of Teut. origin; cf. OE. *stælhrán* decoy reindeer, *stællo* (Northumbrian) catching (of fish), prob. from the root of *steall* place (Stall *sb.*[1]) *stellan* to place; for the sense cf. the rendering of *stale* by 'stacionaria' in the *Promptorium*, and G. *stellvogel* decoy-bird.

It has been usual to regard the *stæl-* in *stælhrán* as identical with the combining form of *stalu* theft (as in *stælgiest* predatory guest, *stælhere* plundering army); but the difference of meaning renders this unlikely; and the current identification of ONorthumb. *stællo* with *stalu* seems inadmissible on grounds both of form and sense.]

Stalemate (stēⁱ·lmēⁱt), *sb. Chess.* [f. Stale *sb.*[6] + Mate *sb.*[1]

Strictly a misnomer, as the 'stale' (so called until 18th c.) is not really a mate.]

A position in which the player whose turn it is to move has no allowable move open to him, but has not his king in check.

According to modern rules, the game which ends in stalemate is drawn. In England from the 17th c. to the beginning of the 19th c. the player who received stalemate won the game. Various other rules have been in vogue at different times; sometimes the player giving stalemate won, either wholly or to the extent of half the stake; sometimes the last few moves had to be played over again until a mate resulted; sometimes the piece causing the obstruction was removed.

1765 Lambe *Hist. Chess* 91 When the King has no man whom he can play, and is not in check, yet is so blocked up, that he cannot move without going into check, this position is called a stale-mate, or Pat, in this case the King who is stale-mated wins the game. 1847 Staunton *Chess-Player's Handbk.* 33 He places the adverse King in the position..of stalemate.

Chess Mag.* 285 Several mediæval problems involve the condition that the one player forfeits his power of moving when his King is in a stalemate position.

Stalemate (stēⁱ·lmēⁱt), *v. Chess.* [f. Stalemate *sb.*] *trans.* To subject to a stalemate.

1765 Lambe *Hist. Chess* 91 In this case the King who is stalemated wins the game. 1813 Sarratt *Wks. Damiano* etc. 235 White cannot take the Rook without stalemating his adversary. 1879 Meredith *Egoist* xlvii, At the game of Chess it is the dishonour of our adversary when we are stale-mated.
